

ESSAA Ltd.

Who are we?

Creato (<https://www.creatogether.app>) is an early staged consumer technology startup in the creator economy. We are building a web-based digital product to enable content creators to get direct monetary support from audience communities. We aim to empower content creators to turn creativities into sustainable professions.

We are a small team of young millennials in Hong Kong with a strong passion in building digital products. We have built B2C & B2B products such as [Glide](#) & [TADO](#). Our supporting partners include HKU iDendron, CityU Tech300, Reactor School & Hong Kong Science & Technology Parks (HKSTP).

We are kindly looking to attract more talents to join our product development journey. Please get in touch with us if you are passionate about creator economy, innovations and technologies.

Full Stack Software Developer (Full-time role)

What is the role about?

It is for young talents who want to be part of a challenging yet rewarding venture. Together as a team, you will be one of the first employees working closely with the founders and will play a vital role in growing businesses and impacts.

Joining as early employees have all the benefits you'd expect – defining your role, leading an entire function, transforming the user experiences. You don't get that at Google or Facebook. It happens only at the beginning.

What you will do? (including but not limited to)

- Front-end / back-end development of web-based & app-based applications.
- Design, architect, implementation, deployment, problem diagnosis and bug fixing of the web-application under the governance of senior developers.
- Assist in data analyses to utilize and refine algorithms that matches with consumer-oriented business logics.
- Build data components for reporting and analytics.
- Perform testing to ensure quality delivery of application, learn and being coached by senior developers via code review meetings.
- Perform any other legitimate duties.

You'll be a good fit if you have:

- A strong passion in building something from zero to one
- Pursuing/completed Bachelor Degree in Computer Science or related disciplines
- Solid knowledge in React JS, NodeJS, React Native, JavaScript, TypeScript, HTML, CSS
- Relevant experience in end-to-end product development lifecycle
- Good Command of written and spoken Cantonese and English
- A good team player with excellent communication skill is a big advantage
